

Pole Mount Rack System

The Pole Mount Rack System is an adjustable, high-strength ground mount for solar module arrays. It includes an angled mounting head that tilts the array for optimum performance; and a mechanism that allows easy installation on uneven terrain, reducing the need for extensive site preparation.

- Angled mounting head is customizable for optimum PV performance
- Dramatically reduces installation time and costs
- Revolutionary angle finder mechanism is ideally suited for uneven terrain by allowing for side-to-side angle adjustments of 0 to 15 degrees
- Reduces need for extensive site preparation
- Corrosion-resistant materials
- All aluminum built-in raceways
- Withstands winds up to 90 MPH
- Underside clip mounting system allows seamless installations
- Patent pending
